SUMMARY

Graduated from **SMK YMIK JAKARTA** Vocational High School majoring in **Computer and Network Engineering**, I am now continuing my undergraduate education at **Mercu Buana University** majoring in **Informatics Engineering**. I am passionate in Web Development, the projects I have created are Property Villa Website using Vue JS framework, Starbucks Cloning Website using HTML & CSS. Enthusiastic in learning new things, detail-oriented, and effective communicator with aspiration to work in Junior Front-End Web Developer. Proficient in understanding customer needs for web user convenience, have knowledge and skills in using programming languages such as HTML, CSS, Javascript as well as frameworks used Vue JS and Tailwind CSS, and excellent problem-solving skills. I also have high learning ability, adapt quickly, communicate effectively, have strong work motivation.

EDUCATIONAL BACKGROUND

SMKS YMIK JAKARTA   *2021 – 2024*

Computer and Network Engineering

- **Experience** : "I am active in participating in competitions that are relevant to my majors and talents, and I am active in school organizations, one of which is Extracurricular Coding for 2 years and is responsible for helping students who have difficulty learning, on the other hand I became a Freelance Front-End Web Developer with friends for approximately 5 months. I have created a Villa website to improve location information for visitors to stay, and can provide a survey of how many stars of satisfaction in staying at the Villa. As for the experience of field work practice at the General Election Commission (KPU) office by inputting office financial data and political party member data using Excel & Spreedsheet."

- **Achivment** : "Won the 1st place in Algorithm Competition at Budi Luhur University, competency competition for students of Information Technology Network System Administrator at DKI JAKARTA Province level, Microsoft Teams Cyber Security Fast-Track Training, C++ Programming Language Training at Budi Luhur University."

- **Projects** : "Properties Website using Vue JS 3, contribution of goods Sales Website using Laravel 10, Clone Starbucks Company Website using HTML and CSS, Fruit Shop Website using HTML and CSS."
